

AMENDMENTS TO THE SPECIFICATION:

Please replace the paragraphs beginning on page 5, line 16 with the following:

FIG. 3 shows ~~[[a]]~~ at least one protrusion, or radial flange 52 formed on the upper end of pipe 34 and has a center opening or port 54. The pipe 34 includes a first end 104 and a second end 106 wherein the radial flange 52 is positioned therebetween. Thus, the pipe 34 possesses a non-continuous outer surface that is defined by the outer diameter of the pipe 34 and the surfaces of the radial flange 52. Water can flow through center opening 54 into drain pipe 34. Sleeve 56 extends longitudinally outwardly from the perimeter of opening 54 forming a surface on its inner diameter.
